Ai/Ml Research Intern

2nd-year B.Tech CSE student specializing in Computer Vision and Deep Learning for medical applications. Experienced in training PyTorch models like ResNet-18 and building robust, crash-proof cross-language architectures using Java and Python. Leveraging high-performance computing to run heavy computational tasks and data mining. Seeking a summer research internship to contribute to advanced medical image processing initiatives.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

CSJM University • GPA: [Your CGPA, e.g., 8.5/10] 2028

- 2nd Year
- Relevant Coursework: [e.g., Data Structures & Algorithms, Linear Algebra, Probability & Statistics, Machine Learning]

Bachelor of Technology (B.Tech) in Computer Science and Engineering

CSJM University

2nd Year

PROJECTS

Pneumonia Detection System

- Engineered a deep learning-based medical image processing system utilizing ResNet-18 and PyTorch to accurately detect pneumonia from a dataset of [insert number, e.g., 5,000+] chest X-ray images, achieving a model accuracy of [XX]%.
- Architected a seamless cross-language integration by bridging the Python machine learning inference backend with a Java Swing GUI using ProcessBuilder.
- Optimized system stability and memory management by implementing robust crash-proofing mechanisms, successfully preventing RAM leaks during heavy graphical and computational workloads.
- Authored comprehensive academic documentation and research methodologies utilizing LaTeX.

SKILLS

Core AI/ML: Computer Vision, Data Mining, Deep Learning, Medical Image Processing, ResNet-18

Frameworks & Libraries: PyTorch

Programming Languages: Java, Python

Architecture & Tools: Cross-Language Integration, Hardware Acceleration (Dell Precision 5820 Workstation), Hardware Acceleration (Workstation Compute), LaTeX, ProcessBuilder
